Green Goo

```
         G7
You're walking down the street minding business of your own.
      C7                          G7
You think you are safe, do you think you are alone.
But then some creepy dude comes walking past you.
    A7                          D7                      Eb7  D7
He tilts back his head, and he gives a big ker-choo!

CHORUS:
        G7
Green goo, green goo.
C7                          G7
 It doesn't matter what you do.
Green goo, green goo.
D7            C7            G7
 It's going to  get all over  you.

      G7
You step into a restaurant, a Mexican buffet.
        C7                                G7
Some girl who wants a tacos screams get out of my way!
You trip over the rug trying to get out of her path.
A7                                D7                  Eb7  D7
Next thing you know you're in a guacamole, bath!

CHORUS

BRIDGE:
           C7                          G7
Now if I had some blue glue and I mixed it with red,
        D7                                G7
then I have some purple goo that I could dump on your head.
          C7                          G7
But if I had some yellow glue, I could mix with that blue,
         A7                          D7                   Eb7  D7
do you know what I get? Oh yes, I think that you do.

CHORUS

D7            C7
 It's going to get all over,
D7            C7
 It's going to get all over,
D7            C7            G7
 It's going to get all over  you.
